

Mayor of Warrington Cllr Peter Carey was on hand to officially open the brand new Urban Building Project's Legends' Lounge at Warrington Town FC's opening home league game of the season.

The sponsors' lounge has been given a complete makeover by Carl Palmer and his team from the Warrington based construction company, which includes former Warrington Wolves' flying winger Mark Forster, who was involved in the joinery work.

As well as sponsoring the lounge, Urban carried out the re-fit at no cost to the club which recently unveiled its 2020 vision to be in the Football League in seven years' time.

Carl said: "We are delighted to be able to support our local football team and wish them every success on their journey."

Club Chairman Gary Skentelbery said: "Thanks to Carl and his team we have a sponsors lounge we can be truly proud of. It has enhanced the match day experience for our club sponsors who are vitally important for our future success."

Meanwhile the club also donated £500 to Malcolm Kondon from St Rocco's Hospice from the Emmerdale charity game held earlier in the year, which also helped raise funds for the club's community development programme.
